

## LA-148 Instructions

Thank you for purchasing the Stromberg Carlson ladder extension. When used properly, this product will provide many years of trouble free service. This kit contains components and hardware for one complete extension ladder to be mounted to your RV's exterior ladder when parked to aid in climbing your RV's exterior ladder.

### **WARNING:**

- Both feet must be on firmly on the ground when in use
- Straps must be securely attached around RV ladder prior to use
- Do not exceed an 11 degree angle when using this extension ladder
- Do not jump on this ladder extension.
- Weight restriction of **250 LBS**
- Do not leave this attached to your ladder when towing.
- Never use without the locking rubber strap securely in place
- Periodically inspect ladder for damage and if damaged do not use.
- Do not use while motor home is running. Exhaust fumes can be a F. HAZARD.**
- Stromberg Carlson is not responsible for any damage if warnings are heeded.

### Installation:

Do not use unless the rubber straps are secured. **Secure straps by pulling the holes in the rubber straps over the round pegs (Fig1). Ladder must always be in contact with the ground (both feet)** and a 11 degree angle for this ladder is recommended...**never vertical**. Failure to follow these instructions could result in injury.
